

# Quality Selections Made Easy: The Quick Selection Tool

AI Ward [ActionFx.com](http://ActionFx.com) Resources for Photoshop

## Step 1

The Quick Selection tool is found close to the top of the Toolbar, and resembles the Magic Wand somewhat.

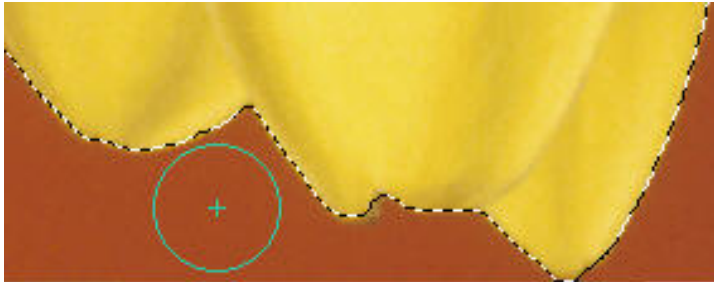

Change the size of your brush to get close!

## Step 2

## Step 3

Make a mistake?

Make the brush size smaller, then hold down the Option/Alt key and paint away that area!

## Step 4

Select > Refine Edge

Refine the selection before you accepts it.

Once you accept what it looks like, press OK.

## Step 5

Press Command J.

Hide the original layer.
